World AIDS Day is a day when people from around the world unite to raise awareness about HIV and to express global solidarity in the face of the pandemic.

Stop AIDS. Keep the Promise! Leadership!
According to UNAIDS estimates, there are now 9.5 million people living with HIV, including 2.3 million children, and during 2006 some 4.3 million people became newly infected with the virus. Around half of all people who become infected with HIV do so before they are 25 and are killed by AIDS before they are 35. Around 95% of people with HIV/AIDS live in developing nations. But HIV today is a threat to men, women and children on all continents around the world. Started on 1st December 1988, World AIDS Day is not just about raising money, but also about increasing awareness, fighting prejudice and improving education. World AIDS Day is important in reminding people that HIV has not gone away, and that there are many things still to be done.

“Be a leader. Inspire others to help fight AIDS through your own actions. Pass out World AIDS Day flyers, design a website, create and lead an e-forum discussion, coordinate a World AIDS Day seminar, host an event to raise money for local AIDS organizations, or discuss AIDS with family and friends to raise awareness of the issue.”
Dr. Garrie W. Moore
University Vice Chancellor
for Student Affairs

Christopher Rosa, Ph. D
University Assistant Dean
For Student Affairs
